

Brilliant BOLLARD

The TESLA™ Bollard

The **TESLA™** bollard showcases our continued commitment to great lighting whether it's indoors or outdoors. The **TESLA™** has been our flagship bollard light for quite some time and has continued to be a fixture that is both reliable and reputable for making great outdoor spaces go from good to great! We invite you to take a closer look at great lighting...

The **TESLA™** keeps it simple, sleek, and stylish. We wanted to create a bollard that brings great lighting and doesn't distract from it. Some key features are:

- The **TESLA™** has a lumin output of 2128 which is perfect for bringing just the right amount of illumination to outdoor areas across various types of outdoor environments.
- We insisted on ensuring that there were various premium features available for this fixture, but only the ones that were reviewed and requested by the architects and lighting designers the most. Needless to say the **TESLA™** remains one of our most popular outdoor offerings for bollards.
- Currently, we're offering the **TESLA™** in one consistent size that has shown us much success in being used consistently in some great builds and projects that we are absolutely proud to have been a part of. See for yourself...

Mansion | Luxury | Entryway

"The **TESLA™** is a part of your world but it is never intrusive. It's there as you need it ensuring that great outdoor environments have an equally great outdoor lighting experience."
